

PNEUMATIC WHEEL CASTERS

A softer alternative than most other industrial caster wheels

Made of rubber, similar to automobile tires / wheels and offer protection for both flooring, and the load

OFFERS LOAD CARRYING CAPACITIES RANGING FROM 320 LBS TO 7,260 LBS

BENEFITS

- Absorbs shock loads from impacts and cushions the load
- Use in uneven or bumpy terrain
- Good for applications with combined off road and on pavement surfaces
- Quiet
- Work conditions improve due to noise reduction

APPLICATIONS

- Ground Support Equipment
- Helicopter Dollies
- Maintenance Equipment
- Mobile Construction Shelters
- Manufactured Housing Applications
- Outdoor Use
- Fragile Loads

SPECIFICATIONS

- Wheel diameters start at 8 inches and go as high as 25 inches
- Usually air-filled, but can be filled with foam
- Ideally suited for moving fragile or delicate cargo
- Provide longer wheel life, less maintenance and high shock absorbency.
